A Complete Guide of Neovim

Claude Lu

October 16, 2024

1   lua

1. put init.lua under **˜/.config/nvim**

2. put .lua file under ˜/.config/nvim/lua

3. One can import table (module) by require("module")

4. Better use require with pcall to increase robustness

5. Use vim.cmd("comman") in lua to pass command to nvim

2   Variables

1. vim.g

2. vim.b

3. vim.w

4. vim.t

5. vim.v

6. vim.env

3   colorscheme

```
:colo -- show current active color scheme
:colo {name} -- load color scheme {name}
```
